

MATHEMATICAL ASSOCIATION OF AMERICA  
AMERICAN MATHEMATICS COMPETITIONS

21<sup>st</sup> Annual (*Alternate*)

AMERICAN INVITATIONAL  
MATHEMATICS EXAMINATION  
(AIME)

Tuesday, April 8, 2003

1. DO NOT OPEN THIS BOOKLET UNTIL TOLD TO DO SO BY YOUR PROCTOR.
2. This is a 15-question, 3-hour examination. All answers are integers ranging from 000 to 999, inclusive. Your score will be the number of correct answers; i.e., there is neither partial credit nor a penalty for wrong answers.
3. No aids other than scratch paper, graph paper, ruler, compass, and protractor are permitted. In particular, calculators are not permitted.
4. A combination of the AIME and the American Mathematics Contest 10 or the American Mathematics Contest 12 scores are used to determine eligibility for participation in the U.S.A. Mathematical Olympiad (USAMO). The USAMO will be given in your school on TUESDAY and WEDNESDAY, April 29 & 30, 2003.
5. Record all of your answers, and certain other information, on the AIME answer form. Only the answer form will be collected from you.

*The publication, reproduction, or communication of the problems or solutions of the AIME during the period when students are eligible to participate, seriously jeopardizes the integrity of the results. Duplication at any time via copier, telephone, email, world wide web, or media of any type is a violation of the copyright law.*

1. The product  $N$  of three positive integers is 6 times their sum, and one of the integers is the sum of the other two. Find the sum of all possible values of  $N$ .
2. Let  $N$  be the greatest integer multiple of 8, no two of whose digits are the same. What is the remainder when  $N$  is divided by 1000?
3. Define a *good word* as a sequence of letters that consists only of the letters  $A$ ,  $B$ , and  $C$  — some of these letters may not appear in the sequence — and in which  $A$  is never immediately followed by  $B$ ,  $B$  is never immediately followed by  $C$ , and  $C$  is never immediately followed by  $A$ . How many seven-letter good words are there?
4. In a regular tetrahedron, the centers of the four faces are the vertices of a smaller tetrahedron. The ratio of the volume of the smaller tetrahedron to that of the larger is  $m/n$ , where  $m$  and  $n$  are relatively prime positive integers. Find  $m+n$ .
5. A cylindrical log has diameter 12 inches. A wedge is cut from the log by making two planar cuts that go entirely through the log. The first is perpendicular to the axis of the cylinder, and the plane of the second cut forms a  $45^\circ$  angle with the plane of the first cut. The intersection of these two planes has exactly one point in common with the log. The number of cubic inches in the wedge can be expressed as  $n\pi$ , where  $n$  is a positive integer. Find  $n$ .
6. In  $\triangle ABC$ ,  $AB = 13$ ,  $BC = 14$ ,  $AC = 15$ , and point  $G$  is the intersection of the medians. Points  $A'$ ,  $B'$ , and  $C'$  are the images of  $A$ ,  $B$ , and  $C$ , respectively, after a  $180^\circ$  rotation about  $G$ . What is the area of the union of the two regions enclosed by the triangles  $ABC$  and  $A'B'C'$ ?
7. Find the area of rhombus  $ABCD$  given that the radii of the circles circumscribed around triangles  $ABD$  and  $ACD$  are 12.5 and 25, respectively.
8. Find the eighth term of the sequence 1440, 1716, 1848,  $\dots$ , whose terms are formed by multiplying the corresponding terms of two arithmetic sequences.
9. Consider the polynomials  $P(x) = x^6 - x^5 - x^3 - x^2 - x$  and  $Q(x) = x^4 - x^3 - x^2 - 1$ . Given that  $z_1, z_2, z_3$ , and  $z_4$  are the roots of  $Q(x) = 0$ , find  $P(z_1) + P(z_2) + P(z_3) + P(z_4)$ .

10. Two positive integers differ by 60. The sum of their square roots is the square root of an integer that is not a perfect square. What is the maximum possible sum of the two integers?
11. Triangle  $ABC$  is a right triangle with  $AC = 7$ ,  $BC = 24$ , and right angle at  $C$ . Point  $M$  is the midpoint of  $\overline{AB}$ , and  $D$  is on the same side of line  $AB$  as  $C$  so that  $AD = BD = 15$ . Given that the area of  $\triangle CDM$  can be expressed as  $\frac{m\sqrt{n}}{p}$ , where  $m$ ,  $n$ , and  $p$  are positive integers,  $m$  and  $p$  are relatively prime, and  $n$  is not divisible by the square of any prime, find  $m + n + p$ .
12. The members of a distinguished committee were choosing a president, and each member gave one vote to one of the 27 candidates. For each candidate, the exact percentage of votes the candidate got was smaller by at least 1 than the number of votes for that candidate. What is the smallest possible number of members of the committee?
13. A bug starts at a vertex of an equilateral triangle. On each move, it randomly selects one of the two vertices where it is not currently located, and crawls along a side of the triangle to that vertex. Given that the probability that the bug moves to its starting vertex on its tenth move is  $m/n$ , where  $m$  and  $n$  are relatively prime positive integers, find  $m + n$ .
14. Let  $A = (0, 0)$  and  $B = (b, 2)$  be points on the coordinate plane. Let  $ABCDEF$  be a convex equilateral hexagon such that  $\angle FAB = 120^\circ$ ,  $\overline{AB} \parallel \overline{DE}$ ,  $\overline{BC} \parallel \overline{EF}$ ,  $\overline{CD} \parallel \overline{FA}$ , and the  $y$ -coordinates of its vertices are distinct elements of the set  $\{0, 2, 4, 6, 8, 10\}$ . The area of the hexagon can be written in the form  $m\sqrt{n}$ , where  $m$  and  $n$  are positive integers and  $n$  is not divisible by the square of any prime. Find  $m + n$ .

15. Let

$$P(x) = 24x^{24} + \sum_{j=1}^{23} (24 - j)(x^{24-j} + x^{24+j}).$$

Let  $z_1, z_2, \dots, z_r$  be the distinct zeros of  $P(x)$ , and let  $z_k^2 = a_k + b_k i$  for  $k = 1, 2, \dots, r$ , where  $i = \sqrt{-1}$ , and  $a_k$  and  $b_k$  are real numbers. Let

$$\sum_{k=1}^r |b_k| = m + n\sqrt{p},$$

where  $m$ ,  $n$ , and  $p$  are integers and  $p$  is not divisible by the square of any prime. Find  $m + n + p$ .

Your Exam Manager will have a copy of the 2003 AIME Solution Pamphlet.

### **WRITE TO US:**

*Correspondence about the problems and solutions should be addressed to:*

Mr. David Hankin, AIME Chair

Hunter College High School, Dept. of Mathematics, 71 East 94th St., New York, NY 10128 USA

Phone: 212/860-1281; Fax: 718/891-3312; email: xhankin@juno.com

*Orders for any publications listed below should be addressed to:*

Titu Andreescu, Director

Mathematical Association of America / American Mathematics Competitions

University of Nebraska, P. O. Box 81606, Lincoln, NE 68501-1606

Phone: 402/472-2257; Fax: 402/472-6087; amcinfo@unl.edu; http://www.unl.edu/amc

### **2003 USAMO**

THE USA MATHEMATICAL OLYMPIAD (USAMO) is a 6-question, 9-hour, essay-type examination. The USAMO will be held in your school on Tuesday, April 29 & Wednesday, April 30. Your teacher has more details on who qualifies for the USAMO in the AMC 10/12 and AIME Teachers' Manuals. The best way to prepare for the USAMO is to study previous years of these exams, the World Olympiad Problems/Solutions and review the contents of the Arbelos. Copies may be ordered as indicated below.

### **PUBLICATIONS**

**MINIMUM ORDER:** \$10. (before shipping/handling fee), PAYMENT IN US FUNDS ONLY made payable to the American Mathematics Competitions or VISA/MASTERCARD accepted. Include card number, expiration date, card holder name and address. U.S.A. and Canadian orders must be prepaid and will be shipped Priority Mail, UPS or Air Mail.

**INTERNATIONAL ORDERS:** Do NOT prepay. An invoice will be sent to you.

**COPYRIGHT:** All publications are copyrighted; it is illegal to make copies or transmit them on the internet without permission.

**Examinations:** Each price is for one copy of an exam and its solutions for one year. Specify the years you want and how many copies of each. All prices effective to September 1, 2003.

- AMC 12 (AHSME) 1995-2003, \$1 per copy per year.
- AMC 10 2000-2003, \$1 per copy per year.
- AIME 1989-2003, \$2.00 per copy per year
- USA and International Math Olympiads, 1989-1999, \$5 per copy per year  
2000, \$14 per copy, 2001 \$17 per copy
- National Summary of Results and Awards, 1989-2002, \$10 per copy per year
- Problem Book I, AHSMEs 1950-60, Problem Book II, AHSMEs 1961-65, \$10/ea
- Problem Book III, AHSMEs 1966-72, Problem Book IV, AHSMEs 1973-82, \$13/ea
- Problem V, AHSMEs and AIMEs 1983-88, \$30/ea. Problem Book VI, 1989-1994, \$24/ea
- USA Mathematical Olympiad Book 1972-86, \$18/ea
- International Mathematical Olympiad Book II, 1978-85, \$20/ea
- World Math Contests/Solutions 1996-97, 1997-98, \$15/ea; 1998-99, 1999-2000, \$25/ea
- The Arbelos, Volumes I-V, and a Special Geometry Issue, \$8/ea

**Shipping & Handling:** Charges for Publication Orders:

<u>Order Total</u>	<u>Add:</u>
\$10.00 - \$40.00 .....	\$ 7
\$40.01 - \$50.00 .....	\$ 9
\$50.01 - \$75.00 .....	\$12
\$75.01 - up .....	\$15
